or Me. Jolandi de Jager at 083 601 9383 or beefpro@mweb.co.za

Signed: _____ **Date:** _____

- **Who should attend the course?**
 - The introductory course is aimed at people who have never used the program or have used it only to a limited extent.
 - **Important:** If the person who will do the data capturing on BenguFarm (e.g. administrative staff member) is not familiar with the day-to-day management of the herd, it is strongly recommended that the person responsible for the day-to-day management, selection and breeding (e.g. herd manager or owner) also attends the course.
- **What does the course entail?**
 - All major/basic features, recording screens, view screens, recording lists and reports in BenguFarm are covered in the course.
 - People attending the course bring their own computers to the course. At the start of the course a course database is we uploaded on each computer and during the course practical exercises are done of all relevant features covered in the course (see program below) as well as calculations, recording lists and reports relating to the relevant functions.
- **Pre-installation of BenguFarm:**
 - The BenguFarm software should be *pre-installed* and registered on the computer(s) brought to the course. No installation will be done at the course. If you need any help with the installation of the software, please contact Leslie Bergh in advance. Please note that BenguFarm can only be installed on a computer with a Windows operating system. If you have a computer with another operating system (e.g. Apple), please contact Leslie Bergh to discuss what to do to install BenguFarm on it.
- **What to bring along to the course:**
 - Computer (with BenguFarm installed and registered), charger/electrical cord, electric extension cord, mouse (it works easier and faster than a laptop's track pad), EID reader and cable (if applicable), Scale head and cable (if applicable), Internet modem (optional), data of animals that need to be imported/entered into the programme, pen, highlighter and paper.
- **Cancellations:**
 - If too few people book, the course may be cancelled by Jinta Trading cc. In such a case the course fee will be refunded in full, or it may be transferred to attend a subsequent course, or for online training.
 - If a booking is cancelled by the attendee within 7 days of the course date, only 50% of the course fee will be refunded, unless otherwise agreed with Jolandi de Jager.
 - Please note that Jinta Trading cc takes no responsibility for cancellation of accommodation, it is every person own responsibility.
- **Please take note**
 - Make sure that Jolandi de Jager has received your application form.
 - Please contact us directly if you still wanted to attend the course and the Thursday, week before the course has already pass. To make sure the course is still on and there is some space available.
